

# NIRS / Eye tracking

Integrate NIRS with eye gaze technology

NIRS+Eye tracking is used in various psychology and neuroscience fields.

Partnership with BiSigma for integrated solutions. Also with other modalities..

NIRS signal is not affected by eye movements, making for a great combination with eye tracking.

Combine eye-tracking with our portable NIRS devices for full freedom of movement.

The Tobii Eye tracking device works seamlessly together with our NIRS devices.

Visit [artinis.com/blogpost-all/nirs-and-eye-tracking](https://www.artinis.com/blogpost-all/nirs-and-eye-tracking) for NIRS and eye-tracking application.
